

BUG HOTEL

Encouraging biodiversity is good for the ecological balance in the garden. Giving these Insects a home can help your garden to prosper and help the conservation of vital wildlife.

How to make a bug hotel:

1. Go for a nature walk and pick up sticks, pine cones, bark, twigs, bamboo canes, plant stems, etc.
2. Find string or twine to hang your bug hotel from a tree.
3. Find a plastic bottle. Cut the top and bottom off the bottle to make a casing.
4. Find 2-3 empty toilet paper rolls.
5. Start layering your bug hotel. Check what materials you have and arrange by size and texture, and arrange pine cones inside the empty toilet paper rolls.
6. Hang your Bug Hotel in a sunny spot in your garden.
7. Wait to see who moves in the Bug Hotel over the next few weeks!
