

# PLANT SCULPTURE

A plant sculpture is a fun way to design and grow plants, vegetables, or herbs in a vertical planter

How to make a plant sculpture:

1. Gather all your supplies: 4-5 terra cotta pots, potting soil, herbs, vegetables or plants, and a wooden stake or rod
2. Gather colorful paint or permanent marker.
3. Make your own designs and let it dry
4. Fill your pots with potting soil 3/4 of the way full and place the rod in the center. Plant your herbs or flowers on the outermost edge and add more dirt as filler as needed.
5. Place the base where you want your vertical planter to be (it's best to build where you want it.)
